

## **EarthElements™ Zero Crystalline Silica Countertops**

Introducing our innovative EarthElements™ Zero Crystalline Silica countertops, the next generation of surface materials designed for both beauty and performance. Our unique formulation features zero crystalline silica, ensuring a safer environment and higher quality products.

EarthElements™ are a new generation of surfaces which are engineered to provide superior performance and aesthetics compared to traditional quartz surfacing products. EarthElements™ proprietary ingredients and exclusive manufacturing processes offer unequaled depth and translucency which produces a cleaner surface with less muted colors consistent with actual marble designs. The veining in EarthElements™ flow across and through the surface, like 3-dimensional natural stones with multi-color veins that refract light.

### **Key Features:**

- **Zero Crystalline Silica Composition:** Provides enhanced hardness and scratch resistance.
- **Advanced Impact Resistance:** With 4x the impact resistance compared to traditional quartz products, our countertops stand up to the rigors of daily use.
- **Superior Flex Strength:** Enjoy 2x the flex strength of traditional quartz products, offering unmatched durability against bending and breaking.
- **Minimal Moisture Absorption:** With only 0.01% moisture absorption, our surfaces resist staining and water damage.
- **Proprietary Blend:** Our exclusive ingredients create a perfect balance of physical properties, aesthetics, value, and safety, ensuring your countertops are as functional as they are beautiful.
- **Aesthetics – Clarity, Depth, Whiter Background:** Accurate marble and natural-stone design surfacing is our specialty. The multi-layer veins pass from subtle to strong coloration and refract light to mimic three-dimensional stone translucency with improved performance compared to traditional quartz products. Superior raw materials and exclusive manufacturing processes ensure all EarthElements™ surfaces achieve the highest level of detail and durability.

Elevate any space with EarthElements™ zero crystalline silica surfaces—where innovation meets style. Perfect for kitchens, bathrooms, and any area requiring a resilient yet elegant surface. EarthElements™ provide unmatched performance and peace of mind.
